

Abstract of the Disclosure

5 An illuminating apparatus for a work vehicle includes a front
illuminating unit, a side illuminating unit, a frame supporting the front
illuminating unit and the side illuminating unit and a translucent lens unit
covering the front illuminating unit and the side illuminating unit. The
front illuminating unit and the side illuminating unit are supported to the
frame. The translucent lens unit comprises a one-piece translucent lens
directly connected and supported to the frame. The frame includes an
10 attaching portion for attaching the frame to a front portion of the vehicle
body.
